

## ADDITIONAL TESTS

[The Orthopedic Foundation for Animals offers addition certification for our breeding dogs.](#)

**Elbow Dysplasia** - Radiographs of the elbows are submitted to OFA for evaluation for the presence of pathology involving the medial coronoid of the ulna (FCP), osteochondritis of the medial humeral condyle in the elbow joint (OCD), and an ununited anconeal process (UAP).

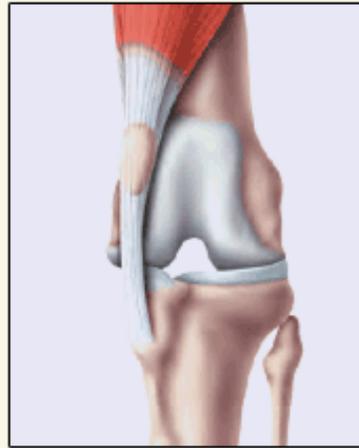

This form must accompany the submission to OFA: [http://www.offa.org/pdf/hdedapp\\_bw.pdf](http://www.offa.org/pdf/hdedapp_bw.pdf)  
NOTE - OFA offers a discount for HIP Dysplasia and ELBOW Dysplasia evaluation when submitted together.

**Patellar Luxation**— A physical exam by the veterinarian or specialist will determine the presence of luxation, whether it's unilateral or bilateral, and to what degree. This evaluation can be done on any dog over 12 months of age. This form is submitted to OFA for certification:

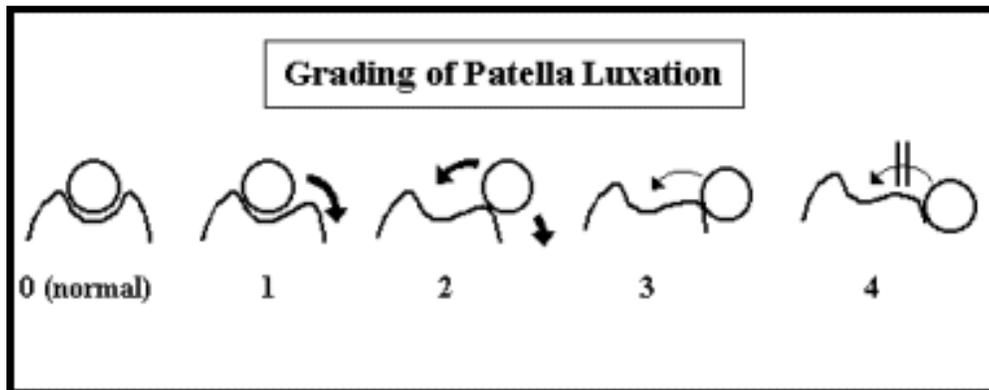

[http://www.offa.org/pdf/plapp\\_bw.pdf](http://www.offa.org/pdf/plapp_bw.pdf)

*Normal patellar alignment. The patella and quadriceps are in alignment and the patella is seated in the groove.*

*Medial patellar luxation. The quadriceps and patella are medial to the trochlear groove and the tibia is rotated medially.*

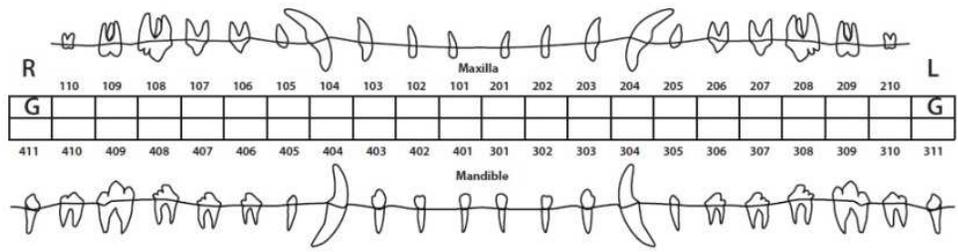

**Dentition Database** – Once all the dog’s adult teeth have erupted, a physical exam can be done to determine the presence or absence of teeth, and if there are any retained deciduous teeth. This form is submitted to OFA for certification:[http://www.offa.org/pdf/dentalapp\\_bw.pdf](http://www.offa.org/pdf/dentalapp_bw.pdf)

**Veterinarian Dentition Examination Results**

- Full dentition with all adult teeth fully erupted
- Retained deciduous teeth
- Missing teeth as noted on the dental chart
- Other (please specify) \_\_\_\_\_

I certify that I have completed the dental exam and marked off the appropriate exam results.  
 I DID verify tattoo/microchip on this dog     I DID NOT verify tattoo/microchip on this dog

---

**Veterinarian Signature** \_\_\_\_\_ Specialty:  Practitioner,  Specialist \_\_\_\_\_ Date \_\_\_\_\_

**Mixed Soft-Tissue Database Discount:**

OFA offers a Mixed Soft-Tissue Database Discounted Individual Rate of \$7.50 per application when three or more soft tissue applications are submitted together on a single dog (example: Cardiac, Patella, Dentition, Thyroid, and/or Eye applications). This discount does NOT apply to any applications requiring radiographic evaluations.

**Litter rate and Kennel Rate Submission Discounts:**

OFA offers certificates for specific databases at a discounted Litter rate on three or more submitted together, or as a discounted Kennel rate when at least 5 individuals submitted as a group that is owned/co-owned by the same person.
